

## CORE SERVICES

As an EPC (Engineering, Procurement, Construction) turn-key solution provider, Life Energy provides a complete end to end experience.

Design Engineering

Consultancy

Project Management

Site survey and energy auditing

Site optimization

Leading technology supply

Solution installation & integration

Operations & maintenance

Real-time remote monitoring

## ADVANTAGES OF RENEWABLE ENERGY GENERATION AND ENERGY EFFICIENCY FOR INDUSTRIAL

### REDUCE YOUR OPERATING COSTS

Your business can hedge against rising energy costs by installing renewable energy generation systems which will allow you to fix your energy costs at lower than market rate for your energy requirements.

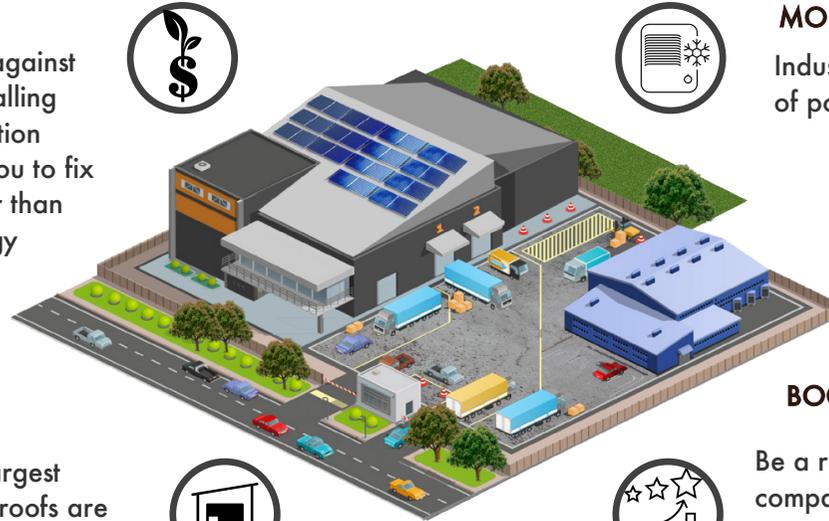

### TURN YOUR ROOF INTO AN ASSET

Take advantage of your largest unused asset. Warehouse roofs are ideal for large renewable energy generation installations.

The solar panels not only generate energy, but also shade the roof, reducing heat exchange into the building, which in turn should reduce your AC energy consumption.

### YOUR CHILLER CAN RUN MORE EFFICIENTLY

Industrial chillers use large amounts of power to run. By installing energy efficiency solutions to your existing infrastructure you could save 10-25% on your chiller operating costs alone.

### BOOST YOUR REPUTATION

Be a renewable energy leader in your company. Installing a renewable energy generation system into your business makes a visual statement to your

customers and employees that you care about the environment and may give you the edge over your competitors.

### ENERGY SOLUTIONS

#### RENEWABLE ENERGY GENERATION

- On-Grid and Off-Grid Solar Photovoltaics
- Wind Generation
- Hybrid Systems
- CPV - Concentrated Photovoltaic
- CSP - Concentrated Solar Power

#### ENERGY EFFICIENCY SOLUTIONS

- Building Energy Management systems
- Energy saving HVAC devices
- High-tech Thermal Barrier coatings
- LED technology
