

CORE SERVICES

As an EPC (Engineering, Procurement, Construction) turn-key solution provider, Life Energy provides a complete end to end experience.

Design
Engineering

Consultancy

Project
Management

Site survey and
energy auditing

Site
optimization

Leading
technology
supply

Solution
installation &
integration

Operations &
maintenance

Real-time
remote
monitoring

ADVANTAGES OF RENEWABLE ENERGY GENERATION AND ENERGY EFFICIENCY FOR OIL & GAS

REDUCE YOUR OPERATING COSTS

By using solar PV generated power during the day to supplement your energy needs and only utilising grid power, gas or diesel for the night hours, you can lower your operating costs.

MAKE ALL YOUR PR POSITIVE

Whether it's justified or not, the Oil & Gas Sector has a not so favourable reputation in public media. By utilising renewable energy and cutting down on gas and diesel fuel use to generate your energy needs, all your PR in the press can be positive.

RELIABLE POWER SECURITY FOR ENERGY PLANTS

Solar energy generation can be an alternative when there's no access to the power grid. If you need electricity available 24/7, then hybrid systems like a solar/diesel installation can be an effective alternative to a diesel or gas powered generator, pump or compressor.

ACHIEVE YOUR RENEWABLE ENERGY TARGETS

Achieve your renewable energy targets and reduce your greenhouse gas emissions by using renewable energy and energy efficiency solutions. Renewable energy can reduce the overall load on the national grid

ENERGY SOLUTIONS

RENEWABLE ENERGY GENERATION

- On-Grid and Off-Grid Solar Photovoltaics
- Wind Generation
- Hybrid Systems
- CPV – Concentrated Photovoltaic
- CSP – Concentrated Solar Power

ENERGY EFFICIENCY SOLUTIONS

- Building Energy Management systems
- Energy saving HVAC devices
- High-tech Thermal Barrier coatings
- LED technology
